

AN ACCIDENT STORY

Friday,
5:42 p.m.

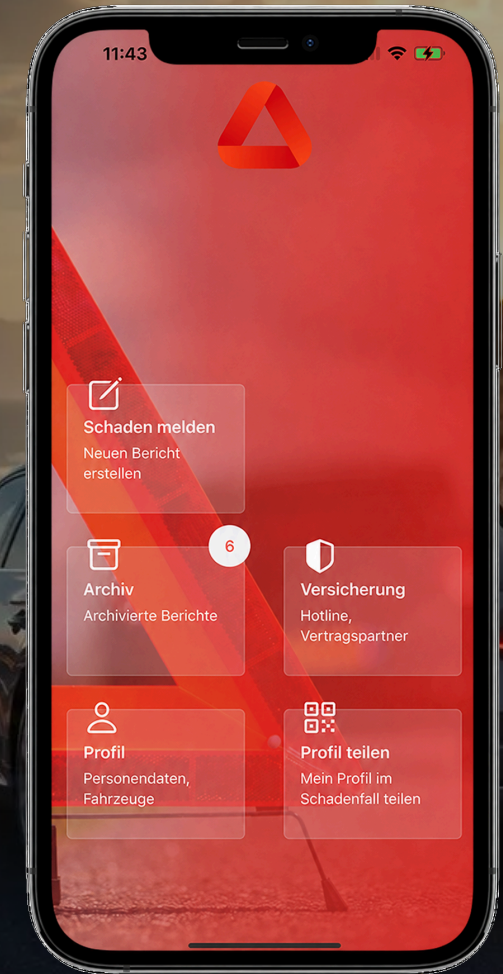

Almost there.
Then it happens.

A minor rear-end collision abroad.

NO ACCOUNT

FREE OF CHARGE

READY OFFLINE

REALITY TODAY

**No paper.
No signal.
No common language.**

Two drivers. Many questions. And still no clear next step.

THAT IS WHAT ACCIDENT TOOL IS FOR

The app brings structure to the moment.

Guided, multilingual and ready even without a stable internet connection. No registration, no login and no in-app purchases.

READY TO USE

FREE

STEP BY STEP

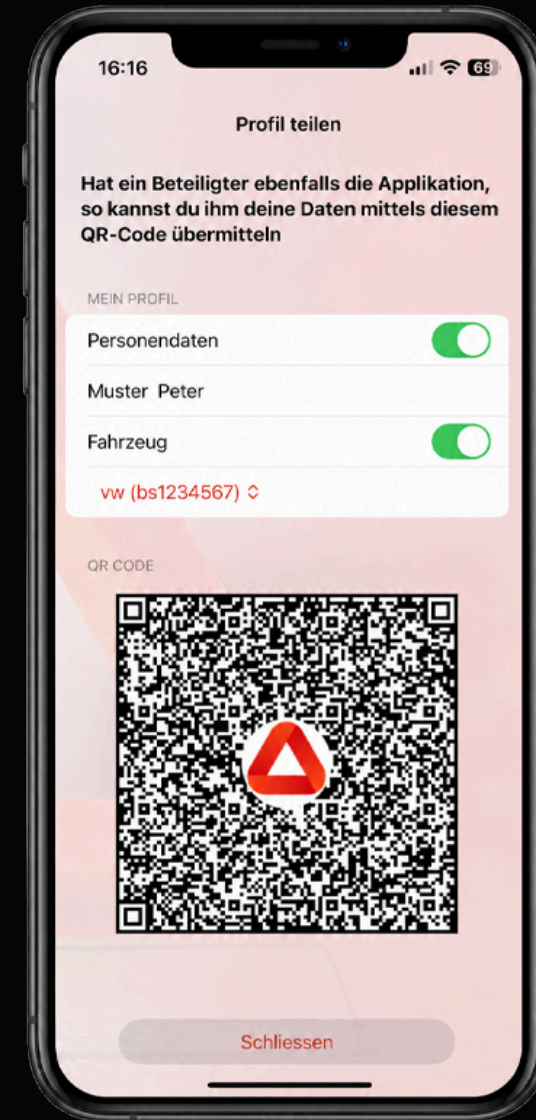

EXCHANGE DATA

Capture once. Share selectively.

App users can transfer personal, vehicle and insurance data by QR code. Control remains with the people involved.

No central accident record at WEBish.

Everyone in their own language.

The same steps and details are explained clearly.

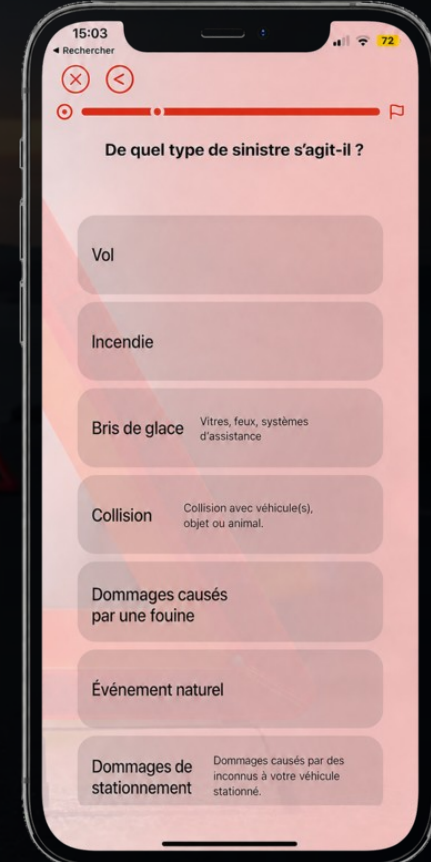

DE

FR

German • English • French • Italian

The new version can support more languages through the planned translation function.

16:31

Partei A

vertragsummer.

UMSTÄNDE:

- verliess einen Parkplatz

URSPRÜNGLICHE AUFPRALLSTELLE:

Die Unterschrift ist kein Schuldeingeständnis, sondern eine Bestätigung der Identitäten und Fakten aus der Zusammenfassung

Hier unterschreiben:

Schliessen

FULLY DOCUMENTED

Everything important in one place.

People • Vehicles • Insurance

Photos • Location • Sketch • Signatures

PDF report • structured XML data

For clear and traceable downstream processing.

Your accident data stays with you.

[0]

central accident records
at WEBish

LOCAL

On the devices

Names, licence plates, policy details, injury information and photos stay on the devices used.

CONTROLLED

Selective sharing

The people involved send the completed report to the chosen insurer or a connected partner.

The claim is ready for the next step.

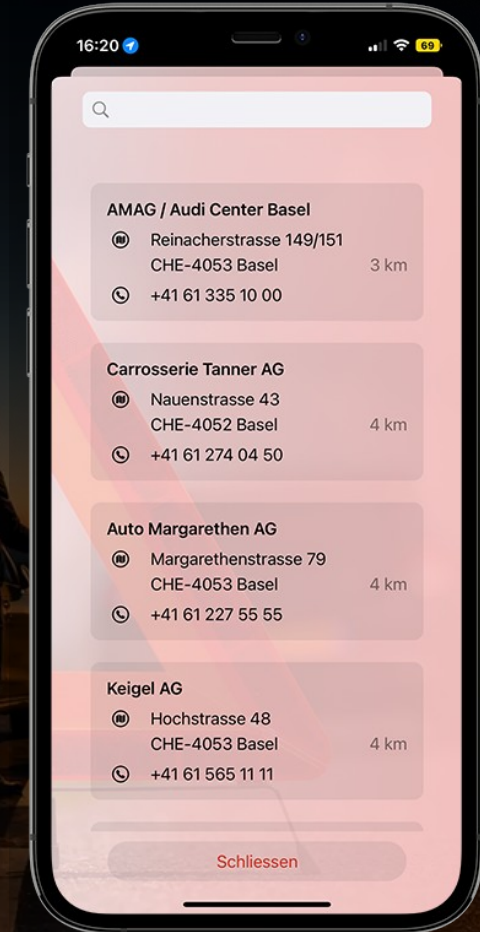

Available today

PDF and structured XML data

Project-specific integrations

Insurer • claims management

Repair shop • towing service • fleet

WHAT ORGANISATIONS CAN GAIN

More structure. Fewer manual handoffs.

CLEAR CASE

Location and time

Accident location and time are available directly in the structured case.

BETTER DATA

Fewer follow-up questions

More complete information can reduce follow-up calls and manual additions.

START FASTER

Start work earlier

Depending on the connection, partners and claims teams can enter the process earlier.

Current data and open interfaces.

IN DEVELOPMENT

Green Card

European insurance data is in development. Once available, the data set is intended to be updated monthly.

AVAILABLE

Structured transfer

PDF and XML are available. Direct connections are implemented for each project.

OPEN INTERFACES

ANY TARGET SYSTEM

Transfers to insurers, authorities and other target systems are possible in any country when specifications are known. MISTRA is one Swiss example.

Show value before making promises.

Together, we define a specific use case and test its impact in the real process.

01 • Scope

Define target group, accident type and desired transfer.

02 • Pilot

Run guided cases within the agreed scope.

03 • Evaluation

Compare completeness, follow-up questions and process steps.

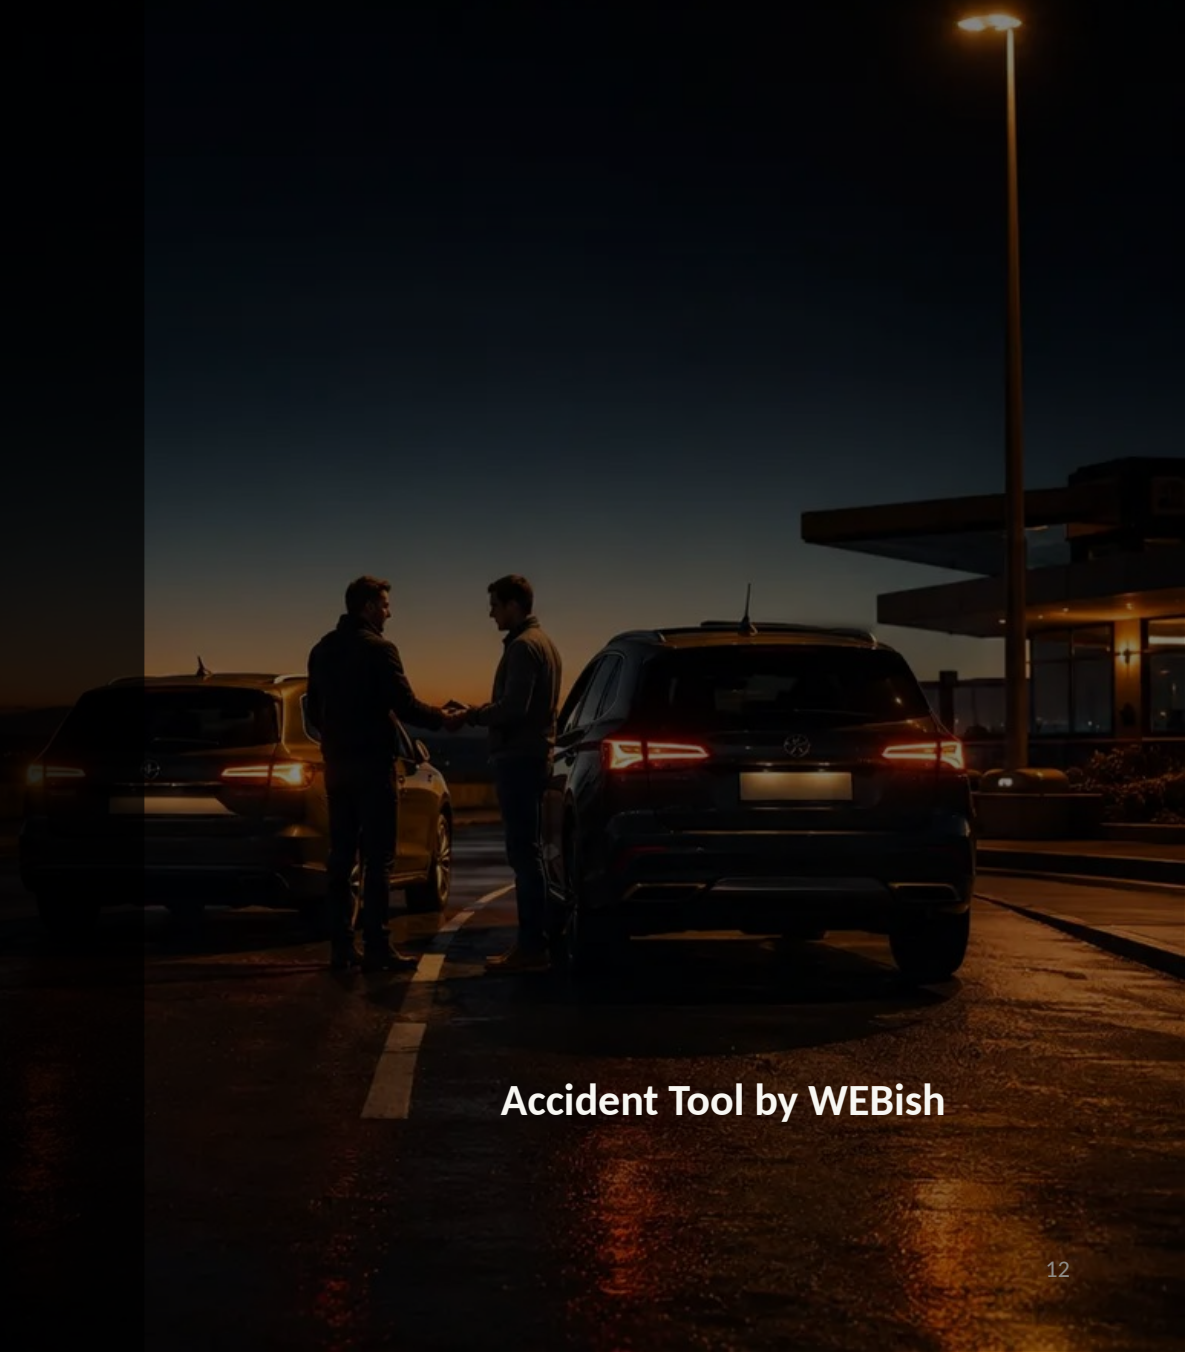

Demo and pilot.

Not theory. A concrete use case with your processes and partners.
